## **Riptide Deploys TRACR System**

Orlando, Florida – December 4, 2007 - Riptide Software, Inc. (“Riptide”) announced today the successful deployment and testing of the TRACR System. TRACR was installed at Blackwell Mountain Multiuse Range, Clear Creek Rifle Alpha Range, and Cowhouse Machine Gun Range at Fort Hood, Texas all within a three-day window of time. The system is scheduled to replace the existing targetry control system at over 80 US Army ranges internationally in the next two years. TRACR provides a low-cost solution for upgrading the existing control system to a modern, graphical, windows-based system with a rapid turnaround for installation ultimately minimizing range downtime.

TRACR currently supports the major target device communication protocols used at the army training installations to include Enhanced Remote Equipment Target System (ERETS) and Future Army System of Integrated Targets (FASIT). In addition, the system supports automated control of target instrumentation devices from multiple device manufacturers.

TRACR further supports live fire exercises (LFXs) for individual and crew served weapon skill qualification and sustainment, and collective training events at local training areas, combat training centers, and in tactical force projection environments. Range Operations (ROPS) personnel use the results of training exercise plans to prepare target devices for exercise execution and to provide realistic friendly, neutral, and threat targets and weapon effect simulation during exercise execution. ROPS personnel also use these training exercise results after exercise execution. TRACR supports training preparation, presentation, and feedback of these training exercises.

### **About Riptide**

Riptide is a wholly owned subsidiary of Shea Development Corp. (OTCBB:SDLP). Riptide is a CMMI Level 3 assessed company that provides On Demand, configurable software solutions and information technology services. Riptide utilizes the latest object oriented and service oriented architectures to produce advanced, user friendly, reliable and cost effective solutions. Riptide’s solutions showcase the latest .NET, Java, Flash and web technologies. Riptide is located in Orlando, Florida.

### **About Shea**

Shea delivers business process management software solutions and service offerings. Shea’s solutions improve its customers’ ability to make better decisions, manage critical business processes, reduce expenditures, and improve efficiency. Shea is an emerging leader in this industry and has a commitment to deliver tangible business results to its customers. The company has a strong track record of delivering mission-critical, reliable solutions on custom, mid-to-large-scale software systems for government, commercial and utility customers. Shea serves its customers through its subsidiaries Riptide Software, Inc., Bravera Inc., and its MeterMesh products, and currently maintains offices in Reston, Virginia; Orlando, Florida; and Ft. Worth, Texas. For more information about Shea and its subsidiaries, please visit [www.riptidesoftware.com](http://www.riptidesoftware.com).
