## Riptide Center for Enhanced Performance Contract Received From US Army/SAIC

DALLAS--(BUSINESS WIRE)--Shea Development Corp., (OTCBB:SDLP), ("Shea") - Riptide Software Solutions, Inc. ("Riptide"), a wholly owned subsidiary of Shea, announced that it has received a sub-contract from SAIC, (NYSE:SAI), to support the United States Military Academy's Center for Enhanced Performance (CEP). The program is being managed by the US Army AMRDEC Software Engineering Directorate (SED). Sub-contracted under SAIC's AMCOM Express contract, Riptide will deliver IMI for "soft skill" training related to confidence, goal-setting, and stress & energy.

The CEP, located at the Military Academy, West Point, New York, is charged with developing the full potential of the United States Corps of Cadets through comprehensive performance psychology and academic skills training. Additionally, the CEP has an Outreach mission to the military outside of the Academy. As the U.S. Army's subject matter expert for key mental skills, the CEP teaches these mental skills to Leaders and Soldiers in order to enhance leader development and performance; with special emphasis on the systematic cultivation of a Warrior Ethos.

Riptide will integrate this IMI with the previously-developed Future Soldier Training System (FSTS). FSTS employs the America's Army game to augment the IMI, creating an effective training environment. The America's Army platform, which is the basis for the U.S. Army's popular PC game, allows for the creation of detailed and engaging environments and interactive scenarios for values and cultural training, education, and operational support. As a learning platform America's Army provides a proven, easy-to-deploy and widely used technology base that is modular and scalable.

Riptide VP, Business Development, Mr. Joseph O'Connell stated, "Both the US Army and SAIC have expressed confidence that Riptide can continue to produce effective training solutions leveraging the Future Soldier Training System that was created for the United States Army Recruiting Command. It is an honor for Riptide to work on this important program."

### About Riptide

Riptide is a CMMI Level 3 assessed company that provides On Demand, configurable software solutions and information technology services to civilian and military government agencies as well as commercial customers in multiple industries. Riptide utilizes the latest object oriented and service oriented architectures to produce advanced, user friendly, reliable and cost effective solutions. Riptide's solutions showcase the latest .NET, Java, Flash and web technologies. Riptide is located in Orlando, Florida. ### About the America's Army Platform

America's Army was designed and developed to employ online game technology as a virtual portal through which young Americans can explore Soldiering in the U.S. Army. Due to its ability to render exceptionally realistic and flexible environments, player interactions, and scenarios, a wide variety of military and government agencies have repurposed the America's Army platform for developing training simulations and applications. The Army Game Project's America's Army Government Applications teams produce effective and engaging virtual learning for Force Protection, Adaptive Thinking and Leadership, and Convoy Survivability, as well as applications ranging from mission rehearsal to modeling advanced weapons systems and fire control systems, all using the America's Army platform. America's Army teams are also developing embedded and appended training devices for the Army's most advanced missile systems, remote weapons stations and nuclear, chemical and biological detection systems. By using the America's Army platform for training development, government and military agencies will be able to train today's heroes in the skills that help them successfully defend freedom at home and around the world.
